Experience

ConnectWise

Mumbai

Frontend Engineer 2

Oct 24 - Present

- Spearheaded the integration of localization features using **i18n** in React, enabling support for **multiple languages** through both internal repositories and cloud-based sources.
- Led the migration of the project to **React 18**, leveraging the latest features to improve performance, scalability, and developer efficiency
- Developed React pages from scratch using **MUI-based** common components for the ConnectWise Manage application, ensuring high performance and intuitive user interfaces.
- Contributed to a shared **TypeScript-based common component library**, building reusable, strongly-typed components and utilities consumed across multiple modules.
- Optimized application performance, initial load times, by externalizing dependencies, implementing memoization, using **Webpack** through code splitting, tree shaking and leveraging lazy loading — **reducing bundle size by 50%**.
- **Mentored junior developers** through code reviews and knowledge-sharing sessions, fostering best practices in React, performance optimization, and maintainable code.

Tata Consultancy Services

Mumbai

Systems Engineer

Jul 21 - Oct 24

- Developed and maintained responsive and user-friendly web applications using **ReactJS**.
- Implemented a **timeout** functionality for the client's main portal, enhancing user session management and improving overall security.
- Achieved a **30% reduction** in module loading time, amplifying overall application performance and user experience..
- Utilized **Redux** for efficient state management, maintaining a centralized application state for complex ReactJS applications.
- Actively contributed to documentation efforts, creating clear and concise technical documentation for fellow team members.
- Spearheaded the complete automation of manual access provision and deprovision processes for the Pfizer support team.
- Used **Agile Development** tools such as Jira, qTest, Vera to handle onboarding of new clients.

Education

Mumbai University

Mumbai

Bachelors of Engineering in IT, 8.54 CGPA

Jun 17 - Jul 21

- **Selected Coursework:** Operating Systems, Databases, DSA, Web Development, Python, Java
- **Awards:** Scored 93/100 in Microsoft Technology Associate Exam Python Programming (MTA 98-381), Scored 10 pointer in Data Structures and Algorithms, Scored 10 pointer in Python Programming

Personal Projects

NetflixGPT - [Github](#)

- Built a movie discovery app integrating **TMDB API** and Firebase authentication.
- Implemented a **GPT-powered search** to allow category/description-based queries (e.g., “Bollywood funny movies”), enhancing discovery experience.

YouTube Clone - [Github](#)

- Developed a YouTube-like app with **live data** retrieval from YouTube's open API.
- Implemented **debounced search** for efficiency and a nested comment system similar to Reddit.
- Used Redux to manage global sidebar state across the application.

Dan's Food Town - [Github](#)

- Developed a Swiggy-like food ordering app using Swiggy API data.
- Optimized with **lazy loading** and modern bundler **Parcel**, improving load performance.
- Implemented shopping cart functionality with Redux for centralized state management.

Technical Skills

Languages: Python, JavaScript

Technologies/Frameworks: ReactJS, TypeScript, MUI, Webpack, Jest, TailwindCSS, Flask, MySQL
